

CARBON SEQUESTRATION ON IDAHO AGRICULTURE AND FOREST LANDS

Idaho Soil Conservation Commission - Boise, Idaho - February, 2003

ACKOWLEDGMENTS

The author of this report is David F. Ferguson, Agricultural Program and Riparian Specialist of the Idaho Soil Conservation Commission. This report was printed in February of 2003.

This report was prepared with the support of many individuals and through a comprehensive literature review. Many references are cited, but numerous other reports were reviewed and credit is due, and without the previous efforts of numerous states, this report would have been much more difficult to prepare.
